Paid Media Opportunity Analysis

Here's what we found when we looked at your market.

The short version: Tiger Data (TimescaleDB) has strong branded search demand — 3,600 people search for "timescaledb" every month. Combined with category keywords like "time series database" (2,900/mo), there's real intent to capture. On LinkedIn, you can reach 300K+ engineering and IT leaders at enterprise companies. We'd recommend starting with $15-25K/month to test both channels.

$15-25K	7,350	1.4M
RECOMMENDED MONTHLY BUDGET	MONTHLY SEARCHES	LINKEDIN AUDIENCE

Google Ads Opportunities

Keyword	Volume	CPC
timescaledb	**3,600**	**$5.69**
time series database	**2,900**	**$10.82**
iot database	480	$15.55
postgresql time series	210	$8.45
influxdb alternative	70	$3.67
timescale pricing	40	$8.93

LinkedIn Audiences

Audience	Size	CPM
Enterprise Eng/IT (Dir+)	**300K**	**$261**
Mid-Market Eng/Ops	1.1M	$161

Full plan includes detailed targeting specs

Why this matters:
Your branded search ("timescaledb") has 3,600 monthly searches at just $5.69 CPC — that's developers actively researching your product. You should own 100% of this traffic. Plus, competitor keywords like "influxdb alternative" let you reach buyers already looking for options.
